

Minnesota General Education Transfer Curriculum

Most awards have General Education Transfer Curriculum (MnTC) requirements. Students seeking an Associate in Arts degree must successfully complete a total of 40 credits of MnTC coursework (See Associate in Arts Degree for specific MnTC goal area requirements). The A.F.A., A.S. and the A.A.S. degrees also use MnTC courses to fulfill their General Education requirements. While not required, some of the Diplomas and Certificates at Minneapolis College also use MnTC courses to fulfill their requirements.

MnTC Goal Area 01: Communication

To develop writers and speakers who use the English language effectively and who read, write, speak, and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking, and discussion.

A minimum of 9 credits, which must include [ENGL 1110](#) or [ENGA 1110](#), and [ENGL 1111](#), as well as an eligible communication studies course.

CMST 1000	CMST 1650	CMST 2012
CMST 1005	CMST 2005	ENGA 1110 Or ENGL 1110
CMST 1010	CMST 2010	ENGL 1111
CMST 1014	CMST 2011	

MnTC Goal Area 02: Critical Thinking

To develop thinkers who are able to unify factual, creative, rational, and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum in order to develop students' awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems..

Completion of the full 40-credit Minnesota Transfer Curriculum or a minimum of one course designated as a MnTC 2 course.

FYST 1100	INFS 2009	
GLOS 1400	INFS 2010	

MnTC Goal Area 03: Natural Science

To improve students' understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today's scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students should be encouraged to study both the biological and physical sciences.

A minimum of two courses in different disciplines, one course must have a traditional lab and the other course must have a traditional lab or lab-like experience.

COURSES	COURSES	COURSES
ASTR 1100	BIOL 2227 and BIOL 2228 *MnTC 3 requires both lecture and lab.	CHEM 2204 and CHEM 2224 *MnTC 3 requires both lecture and lab.

BIOL 2224	CHEM 1152	PHYS 1211
---------------------------	---------------------------	---------------------------

MnTC Goal Area 04: Mathematical and Logical Reasoning

To increase students' knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments, and detect fallacious reasoning. Students will learn to apply mathematics, logic, and/or statistics to help them make decisions in their lives and careers. Minnesota's public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra..

A minimum of one course.

MnTC Goal Area 05: History and the Social and Behavioral Sciences

To increase students' knowledge of how historians and social and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events, and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

A minimum of two courses, in two different subjects.

MnTC Goal Area 06: Humanities and Fine Arts

To expand students' knowledge of the human condition and human cultures, especially in relation to behavior, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy, and the fine arts, students will engage in critical analysis, form aesthetic judgments, and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

A minimum of two courses, in two different subjects.

MnTC Goal Area 7A and 7B: Human Diversity (7A) and, Race, Power and Justice (7B)

All Goal Area 7 courses offered at Minneapolis College are assigned to MnTC Goal Area 7A and 7B Human Diversity, Race, Power, and Justice.

Goal Area 7A To increase students' understanding of individual and group differences (e.g. race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States' historical and contemporary responses to group differences.

Goal Area 7B build knowledge and understanding of historic and contemporary structures of racism in the United States, which systemically shape complex social, political, economic, and environmental inequities experienced by marginalized groups and identities, and promote agency to address matters of structural inequality.

A minimum of one course.

MnTC Goal Area 09: Ethical and Civic Responsibility

To develop students' capacity to identify, discuss, and reflect upon the ethical dimensions of political, social, and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others' positions, be part of the free exchange of ideas, and function as public-minded citizens.

A minimum of one course.

MnTC Goal Area 10: People and the Environment

To improve students' understanding of today's complex environmental challenges. Students will examine the inter-relatedness of human society and the natural environment. Knowledge of both bio-physical principles and socio-cultural systems is the foundation for integrative and critical thinking about environmental issues.

A minimum of one course.
